

Road map test

In this test, you will be shown a map of a city with a path drawn through it. Suppose that one day, you went for a walk and followed the path through the city that is shown. At each turn that the path takes, your task is to decide whether you would turn to your right or your left as you are walking. If it is a right turn, write an 'R' at the turn. If it is a left turn, write an 'L.'

Here is a short practice path. Notice that the path starts in the upper right. At each corner, write either an 'R' or an 'L'.

The correct answers were 'L', 'R', 'R', so your map should look like this:

Please ask the experimenter if you have any questions.

You will have one minute to complete the path on the following page. Note that the start of the path will be at the top of the page (where the word "start" is written) and that not all of the turns will be 90 degrees.

Do not turn the page until the experimenter instructs you to do so.
